

Guidelines for the Blood Transfusion Services

5.9: Information to be provided to the donor post-donation

<http://www.transfusionguidelines.org/red-book/chapter-5-collection-of-a-blood-or-component-donation/5-9-information-to-be-provided-to-the-donor-post-donation>

5.9: Information to be provided to the donor post-donation

The donor must be provided with information on care of the venepuncture site and requested to report any illness occurring within 14 days of donation. They will already have been made aware of the importance of informing the Blood Establishment of any event that may render their donation unsuitable for clinical transfusion.
